Personality

ORGANIZED · EXTROVERTED · SPONTANEOUS · LOYAL

Bio

Alex works as an account manager for a large advertising company. Alex often brings his clients to restaurants as part of building good relationships. His preferred choice of payment at restaurants is a credit card. He does not believe in paying for the annual charges on his credit cards. He feels he already has too many card payment applications to manage on his mobile. Instead, he checks for discounts at the time of purchase and uses the appropriate card if it allows him to save money.

Pain points

- Requesting for a fee waiver is difficult
- Not having control of interests being charged
- Downloading mobile apps for every bank he has an account with

Goals

- Credit card information should be displayed clearly
- Organize his spending across various credit cards depending on his potential savings
- Get on-demand access to current credit card promotion & offers

Needs/Wants

- Want to be alerted if any transaction happens
- Easily track on transactions and manage purchases, savings

Frequently used Payment/Bank Apps

PayPal · G Pay · HSBC · citi CITIBANK

Technology

“I love the benefits that my credit cards give me”
